Projects

Hungry For Jobs ⬈

"Hungry for Jobs" is a platform designed to bridge the gap between job seekers and employers. Job seekers can create detailed profiles highlighting their skills and experience, search for jobs using various filters, and submit applications directly through the platform. On the other side, employers can create company profiles, post job listings with comprehensive details, manage incoming applications, and communicate with potential candidates. The platform offers features like personalized job recommendations, mobile accessibility, user reviews, data privacy, and analytics. Overall, it aims to streamline the job search process while providing tools for effective candidate evaluation and communication for employers.

Everything Kuwait ⬈

"Everything Kuwait" is an e-commerce platform that offers a wide range of products for purchase. It provides both a user-friendly website and a mobile app for convenient shopping. Customers can explore the diverse product offerings and make purchases through the platform, making online shopping accessible and seamless.

Turkish Grill ⬈

"Turkis Grill" serves as a restaurant ordering and food delivery platform operating in Kuwait. Through its website, customers can conveniently place orders from the restaurant's menu and opt for food delivery services. This system aims to streamline the process of ordering food online and having it delivered to customers' locations.
